

Beyond the Numbers: Exploring Data Science and Big Data Innovation

July 6th, 2026

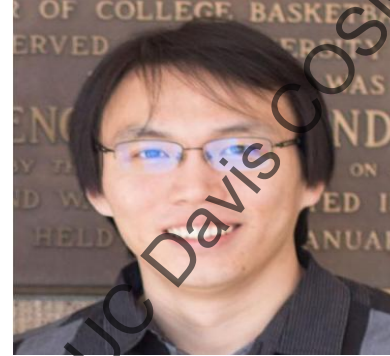

For academic use exclusively within the UC Davis COSMOS.

Team

Instructors:

Prof. Xiucai Ding

Prof. Shizhe Chen

Teaching Fellow:

Mr. Chen Qian

Teaching Assistants:

Wonjun Seo

Phoebe McDonald

Basics

- **Location:** Physical and Data Sciences Building (PDSB) 1025;
- **Cluster website:** <https://ucd-cosmos-data.github.io>
- **Morning:**
 - 830am-845am: morning updates (if any) or reading
 - 9am-945am: Lecture one
 - 10am-1045am: Lecture two
 - 1055am-1130am: Lecture three
- **Afternoon:**
 - 1pm-210pm: Lecture four (if needed)
 - 230pm-5pm: Lab and Exercise

Special date

- Wednesday afternoon (1pm-215pm): ARC for public lectures
- Field trip: July 16th and July 21st
- July 31st afternoon: Project setup in ARC
- Group assignment: July 6th
- Dataset assignment: July 15th

For academic use exclusively within the UC Davis COSMOS.

Cluster project and showcase

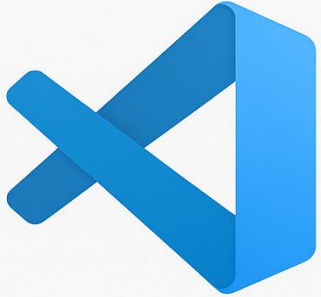

- Five groups: 22 students, 2 5's and 3 4's
- Lottery five datasets from 9 options
- Showcase your final projects using Github website
- https://gitbrent.github.io/PptxGenJS/demos/?utm_source=chatgpt.com
- <https://poloclub.github.io/ganlab/>
- Individual vs Group accounts
- Projector and Screen (mobile)

VSC, Github and Codex (hands on!)

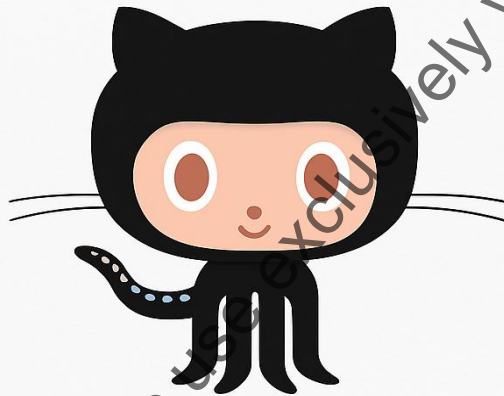

- <https://code.visualstudio.com/>
- <https://github.blog/>
- <https://openai.com/codex/>

VS Code

A code editor for writing and editing code

GitHub Website

A platform for hosting and sharing code

Codex

Lottery for Teams and Datasets

- **Lottery for your team (July 6th , this afternoon!):**

1. The Deep Learners (5)
2. The Optimizers (5)
3. The Data Miners (4)
4. The Backpropagators (4)
5. The Pattern Seekers (4)

- **Lottery for Datasets (July 15th)**

- Datasets may/will be provided
- Can be traded between groups

After the lottery today....

-  **Get Started with Your Tools**
Create and activate your accounts for Visual Studio Code (VSC), GitHub and Codex.
-  **Build Your GitHub Website**
Begin working on your personal or group GitHub Pages site.
Use the site to present your data projects, analysis results, and other creative work.
-  **Connect with Your Teammates**
Follow your classmates on GitHub.
Collaborate by reviewing each other's code, giving feedback, and co-editing repositories.
-  **You Are the Designer & Maintainer**
Customize your GitHub site with themes, colors, and sections.
Organize content that highlights your learning and creativity.
-  **Showcase It in Your College Applications**
